Experience

EVO SECURITY (SERIES A STARTUP)

Software Engineer I

REMOTE (DALLAS, TX)

Sept 2025 - Present

Associate Software Engineer

July 2024 - Sept 2025

- Owned and executed the end-to-end product delivery of an overhauled customer onboarding flow using Ruby on Rails and Vue, directly lowering friction and accelerating initial user activation metrics.
- Designed and built custom internal GitHub packages for automated metadata processing and AI-powered file analysis reports, boosting platform file-safety visibility.
- Maintained existing legacy React infrastructure while leading the complete UX modernization of the primary client portal using Nuxt and TypeScript, acting heavily on direct user feedback.
- Collaborated with an international team via daily meetings, using Jira to properly assign and manage project tasks and goals, completing PR and QA reviews, and giving overall guidance to others

ECOLAB

DALLAS, TX

Software Engineer Co-op

Jan 2023 – May 2023

- Collaborated with a 25-person international team to enhance functionality and resolve system bugs for the Prep N Print application, improving user satisfaction by 20%
- Demonstrated expertise in UI redesign using C# and Xamarin, ensuring compliance with requirements and elevating the user experience
- Pioneered the design of the user interface for a new company application using Figma, actively engaging stakeholders to gather inputs and incorporate 90% of their feedback through biweekly meetings

ALPINE SOFTWARE

MENDON, NY

Software Developer Co-op

May 2022 – Dec 2022

- Spearheaded the programming, maintenance, and support of existing applications using Delphi and SQL, ensuring seamless operations
- Mentored a team of 4 interns, resulting in a 25% increase in their productivity and the successful completion of 15 additional projects weekly
- Collaborated closely with clients, expertly translating project requirements into comprehensive design specifications that aligned with client expectations, ensuring successful project delivery

Projects

CLEPA - AI HOME CARE ASSISTANT

Aug 2025 – Present

- Built an AI-powered care assistant from zero-to-one asynchronous AI pipeline using FastAPI, Firebase Firestore/Auth, GCP, and Google Gemini, translating telehealth visit transcripts into everyday language to help patients and caregivers better understand medical guidance.
- Engineered a secure, authenticated frontend using Nuxt (Vue) and Firebase Auth, establishing scalable REST API patterns and token-handling frameworks.
- Tracked user onboarding and drop-off bottlenecks by instrumenting product flows with Firebase Analytics, driving product iterations ahead of a public beta waitlist launch.

SIMULATION OF PROTEIN SYNTHESIS

Sept 2023 – May 2024

- Steered the redesign of a pivotal product used by students to simulate protein structure, emphasizing modernization and enhanced functionality
- Implemented the transformation of back-end software from Java to Python, leveraging Pytest for robust testing and the Biopython library for advanced functionality
- Led the development of the API and backend, ensuring seamless integration with the redesigned system

Education

ROCHESTER INSTITUTE OF TECHNOLOGY

Rochester, NY

B.S Software Engineering, Minor Computer Engineering

Grad Date: May 2024

Skills

Technical: React, Python, C, C#, Java, Ruby on Rails, JavaScript, Typescript, Postgres, FastAPI, Vue, Nuxt

Tools/Cloud: Cursor, Codex, Windsurf, Agentic AI Development GCP, Firebase, Jira, Git

Soft Skills: Leadership, Effective Communication, Team Collaboration, Client Relations, Agile Methodologies
